

ARIEL CHRISTIAN FELICES

Senior Data Analyst

Cavite, Philippines | arielchristian.felices@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Senior Data Analyst with 5+ years of experience spanning analytics, research, and data management. Combines SQL, Python, Power BI, Excel, and R to build governed datasets, analytical models, dashboards, and automated workflows that improve data quality and turn complex business questions into reliable decision support.

Core Skills

Analysis and BI: SQL, Power BI, DAX, Amazon QuickSight, Tableau, Excel, Google Sheets, Python (pandas), R

Platforms: AWS (Redshift, Athena, S3), PostgreSQL, SQL Server, Microsoft Fabric, Streamlit

Methods and domains: Data profiling, validation and reconciliation, root-cause analysis, regression, KPI definitions, market share, pricing and margin, inventory scenarios

Quality and delivery: R/R Markdown validation frameworks, lineage and grain analysis, dbt documentation (Markdown/YAML), Git and pull-request workflow, application and release testing

Professional Experience

Sunco Lighting, Inc.

Senior Data Analyst | Feb 2026 - Aug 2026

- Designed and built a Power BI competitive-intelligence solution using SQL, DAX, and search-term analysis, then validated, published in Power BI Service, and maintained the approved report for Ads Team use.
- Designed, built, and delivered a governed market-share intelligence solution in Python and SQL, completing a tested and approved Streamlit review application and separately packaging and transferring a release-tested Codex Skill adopted by stakeholders for decision support.
- Built the analytical logic and recommendation model for an approved aged-inventory tool in Excel, translating inventory and financial assumptions into recommendations used in recurring monthly reviews and stakeholder decisions.
- Developed a pricing-opportunity model combining fulfillment-margin analysis with validated Power BI views, enabling stakeholders to compare pricing options and evaluate recommendations through a consistent review process.
- Investigated Redshift reporting discrepancies and unsafe aggregation, delivering reusable validation SQL and dbt documentation that made metric definitions, data lineage, and reporting grain traceable.

LifeBank Foundation

Data Analyst (Consultant) | Apr 2024 - Apr 2026

- Designed and deployed a reusable R/R Markdown data-quality framework across operational datasets, automating recurring validation, exception reporting, and audit-cycle comparisons for source-owner remediation.
- Authored and implemented the formally approved data-quality operating protocol, establishing a repeatable audit and remediation process that transitioned into recurring Data Engineering execution.
- Led and delivered an approved financial-behavior reporting program using logistic regression, OLS, and quantile regression to evaluate repayment and savings behavior and inform stakeholder decisions.
- Built and validated analytical populations by checking repeated observations, unit of analysis, completeness, missingness, and continuity, producing decision-ready visualizations and reports for recurring stakeholder reviews and follow-up analyses.

Theoria Medical

Lead Data Analyst | Sep 2025 - Dec 2025

- Led Partner Portal analytics for Mission Health, delivering 90-day login trends, MoM usage metrics, and facility/user-level insights used by Product and Operations leadership for access monitoring and decision-making.
- Proactively accelerated the QMD (Quality Measures Dashboard) migration by assuming ownership from another hub, helping complete the BigQuery-to-Fabric transition in approximately 30% fewer working days than planned and advancing delivery of one of Theoria's highest-priority reporting assets.
- Collaborated with Product Owners, Data Engineers, and the VP to clarify business logic across EMR, ADT, and facility-linked workflows; provided initial validation for RDCO dashboard sources and strengthened alignment between clinical operations and reporting needs.

Talleco.com, Inc. / JobTarget

Data Scientist | May 2023 - Sep 2025

- Built and maintained the core Amazon Athena Marketplace reporting dataset, owning validation and documentation and publishing it in Amazon QuickSight for use by senior data leadership and business stakeholders.
- Built CPA forecasting models and anomaly-detection logic using historical campaign data, integrating actuals, forecasts, and alerts into dashboards that enabled Product and Operations teams to identify performance deviations earlier and prioritize campaign investigations.
- Reconciled Marketplace analytical records against Finance's operational reporting, achieving a 97% record-level match with particular focus on revenue values and giving the VP of Data Solution a more consistent basis for revenue discussions with Finance.
- Mentored interns and newly hired analysts through structured onboarding and Python/R training, driving team-wide upskilling and faster adoption of analytics tools; recognized as Employee of the Year (2023) for high-impact cross-functional contributions.

UL Solutions

Research Lead | Jul 2017 - Apr 2023

Data Management Team, Research Division

- Led the Data Management Team within the Research Division, coordinating regulatory product-data maintenance, reference updates, change requests, and delivery tracking to keep research datasets current and review-ready.
- Led structured data audits and exception-tracking workflows, coordinating corrections, workload planning, handoffs, and cross-functional follow-up to keep issue ownership and delivery progress traceable.

Education

BS in Electronics and Communication Engineering

Emilio Aguinaldo College | 2002 - 2008

Selected Analytics Projects

Multiple Linear Regression - Modeled sales against TV, radio, and newspaper advertising spend using pandas and scikit-learn; compared features and interaction terms with train/test evaluation, R^2 , and RMSE.

Customer Market Segmentation - Applied scaling, K-means clustering, elbow-method cluster selection, and PCA visualization to a customer dataset to explore customer segments.

Professional Development

Advanced DAX for Microsoft Power BI Desktop

Excel Skills for Data Analytics and Visualization Specialization

Modern Big Data Analysis with SQL Specialization

Applied Data Science with Python Specialization

Statistics with Python Specialization
